

FOSS

Has everything to do,

An idea hacking talk,

Use it and make the real use of your priceless time you have !

Paras Kuhad

0. Psychology of things, and why it matters

1. I would start with asking a question to you

2. The problem of levels

3. If you guys want to do really good, then how foss comes here and How it works

4. Alright, who is doing open source ? Case studies ! The biggies

5. How simple ideas are and how powerful their impact is ! Case studies ! One man army

6. How to start ?

7. Start solving problems and get familiar with stuffs you really care about

8. Free is about freedom, freedom is about greatness and great things are \$\$\$

9. Solving complex problems isn't enough

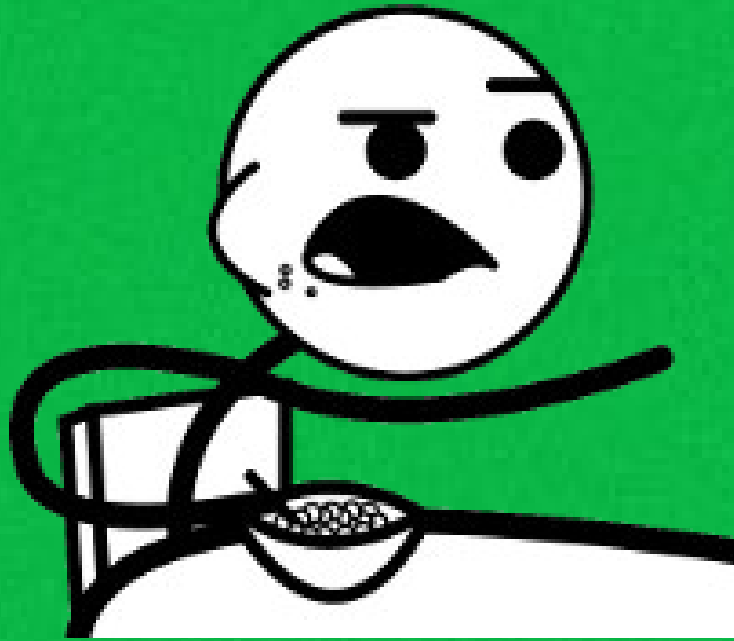

10. What is the cost to start

11. The last word

Psychology of
things, why it
matters !

This guy is holding
papers to read his
talk ! Yuk

I told you Psychology matters ! This is how
we think about things

So true

That's how billions of facebook likes are generated each day

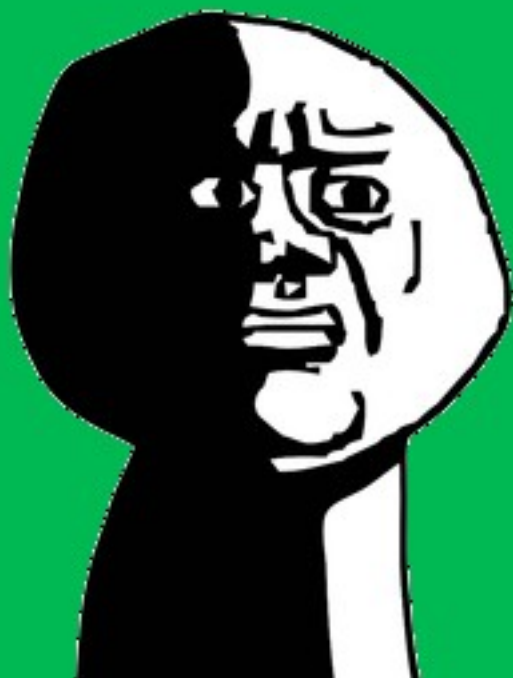

That's how billions of tweets are generated each day

That's how you write your sentiments on social networks and like pages which are either funny or either talk about 'heart touching' sentiments

1

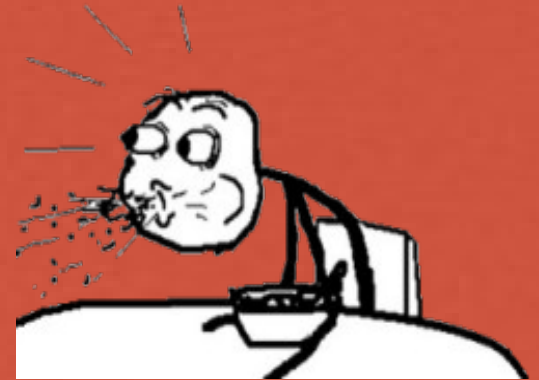

1 «

Let's ask a
question

Oh God Why !!

Are you guys really doing good ?

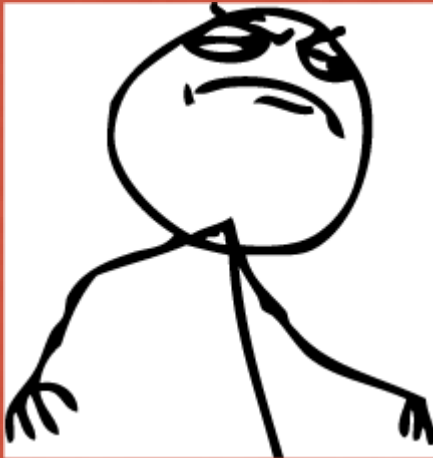

2

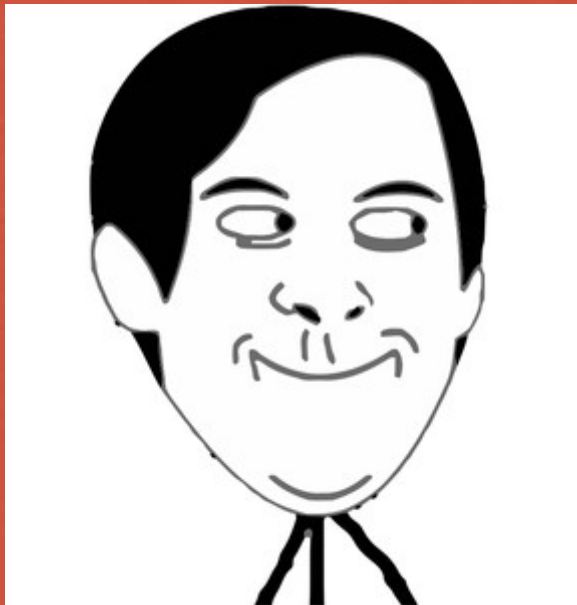

2 «

The problem of levels

This not my level !

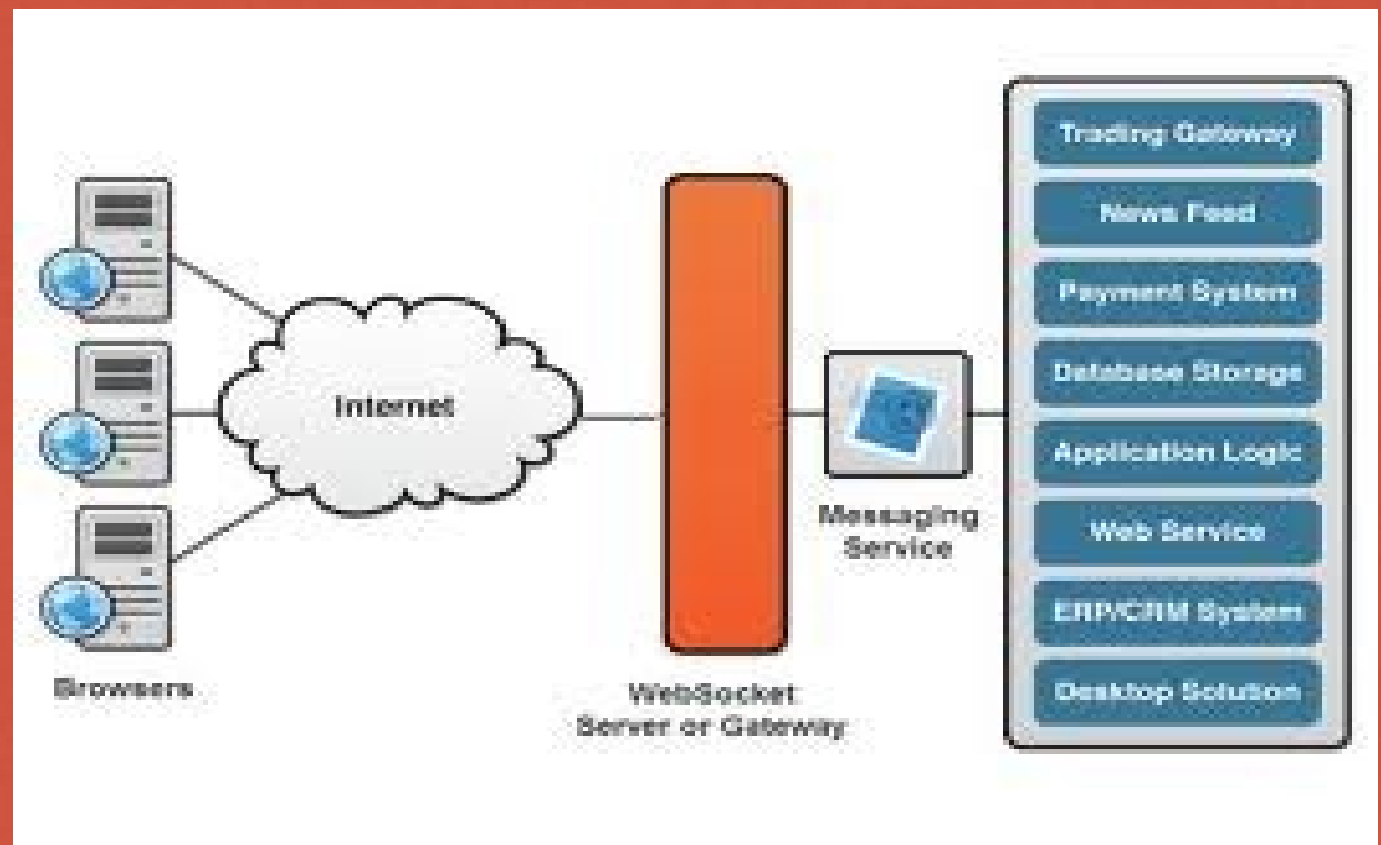

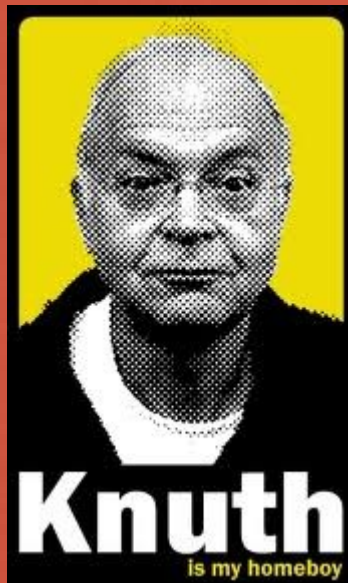

I am not supposed to worry,
I and Xfosys are made for each other.
Hail aptitude prep

LADY GAGA

Because the name Lady Coochie-Coochie-Coo would have been too silly.

www.ladygaga.com

Comapnies calling me

We really care about things which really interests, or we are really interested in
So the problem of level is a fake problem
this is a straight forward excuse made by you
and made for you.

The only thing which matters is how long you be
with one problem, how passionate you are about
it

how deeply you want to solve it

So wouldn't it be great if you work with your
interests !

3

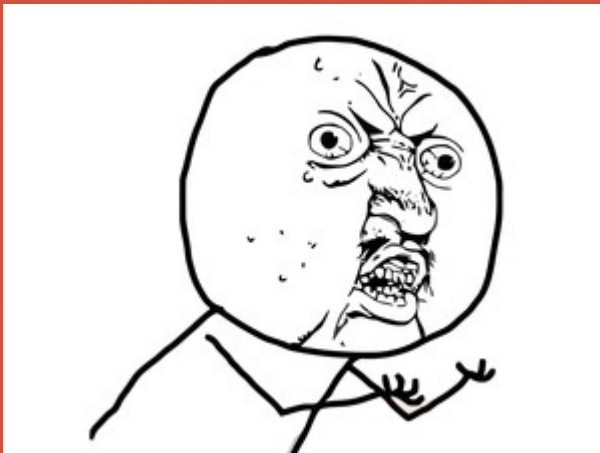

3 «

So, you want to
do great, How
FOSS helps

the greatest wisdom of this earth has been
exposed on internet

We study open source every day, we study
shared wisdom

Code is shared to make it more awesome to
make it more usable to make it such so that more
and more people can use it and only credit goes
to you.

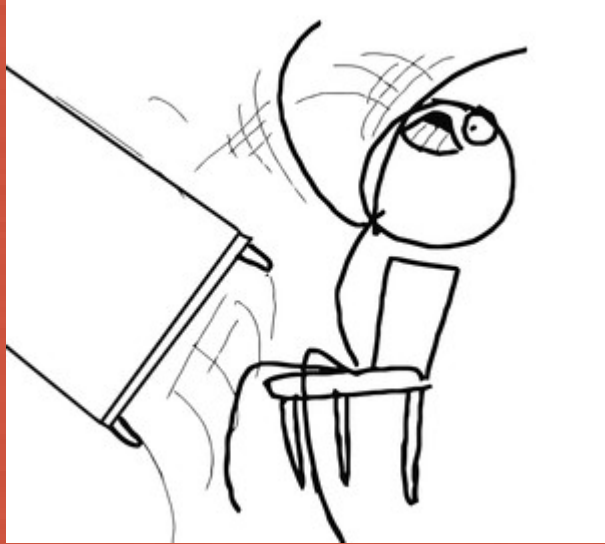

Y U No !!

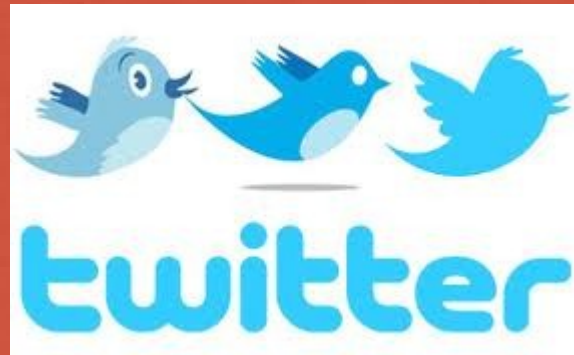

4

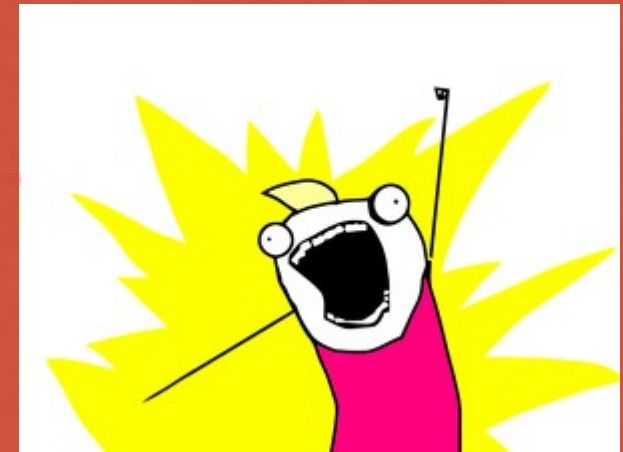

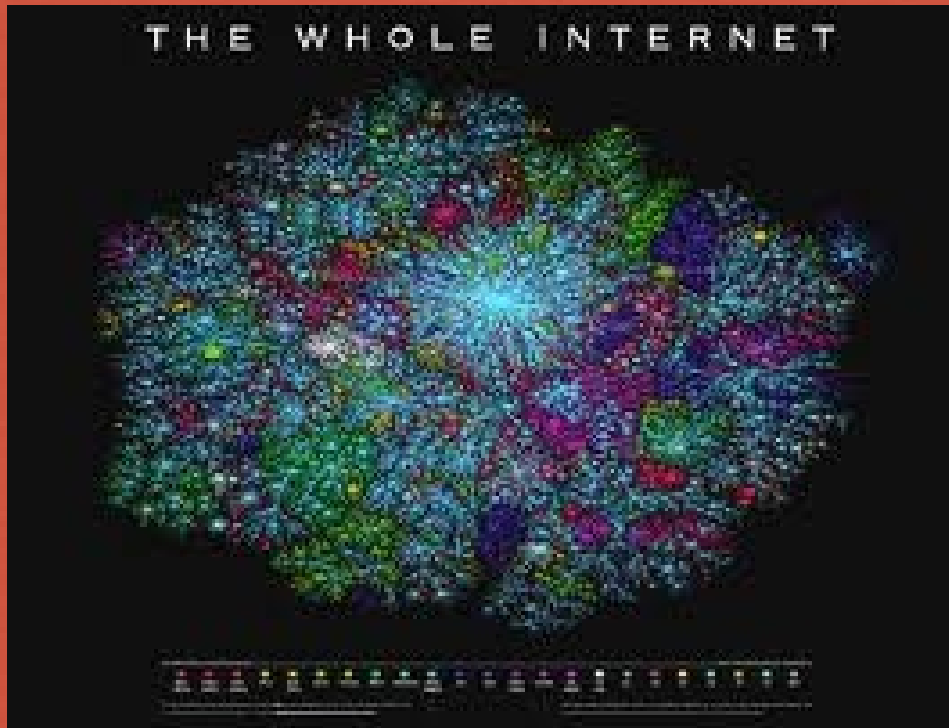

4 «

Alright, who is
doing open
source ?

Who Not !!

Future is open source

5

5 «

How simple ideas
are and how
powerful their
impact is

Memcached : Caching system

Jquery : Awesome javascript library

Linux was a fun project , now red hat is 1 billion dollar company

Drupal -> Acquia

Even simpler ideas in nature has more impact

1000memories.com

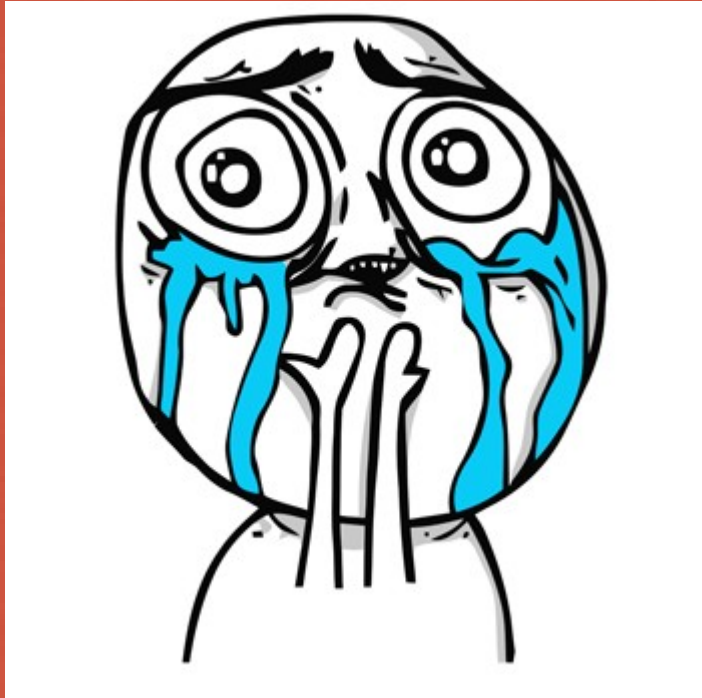

Reddit, Hacker News

These are a few

6 «

How to start !!

Just tell me, How to start !!

You will have to figure out what problem you want to work on.

Learning things without a target doesn't make sense

You learn a stuff while doing it,

You don't want to think too big from the first day
beautiful things are simple in nature

Starts from simple things

Just make useful things !

Lurk into community things, those are similar to your passion.

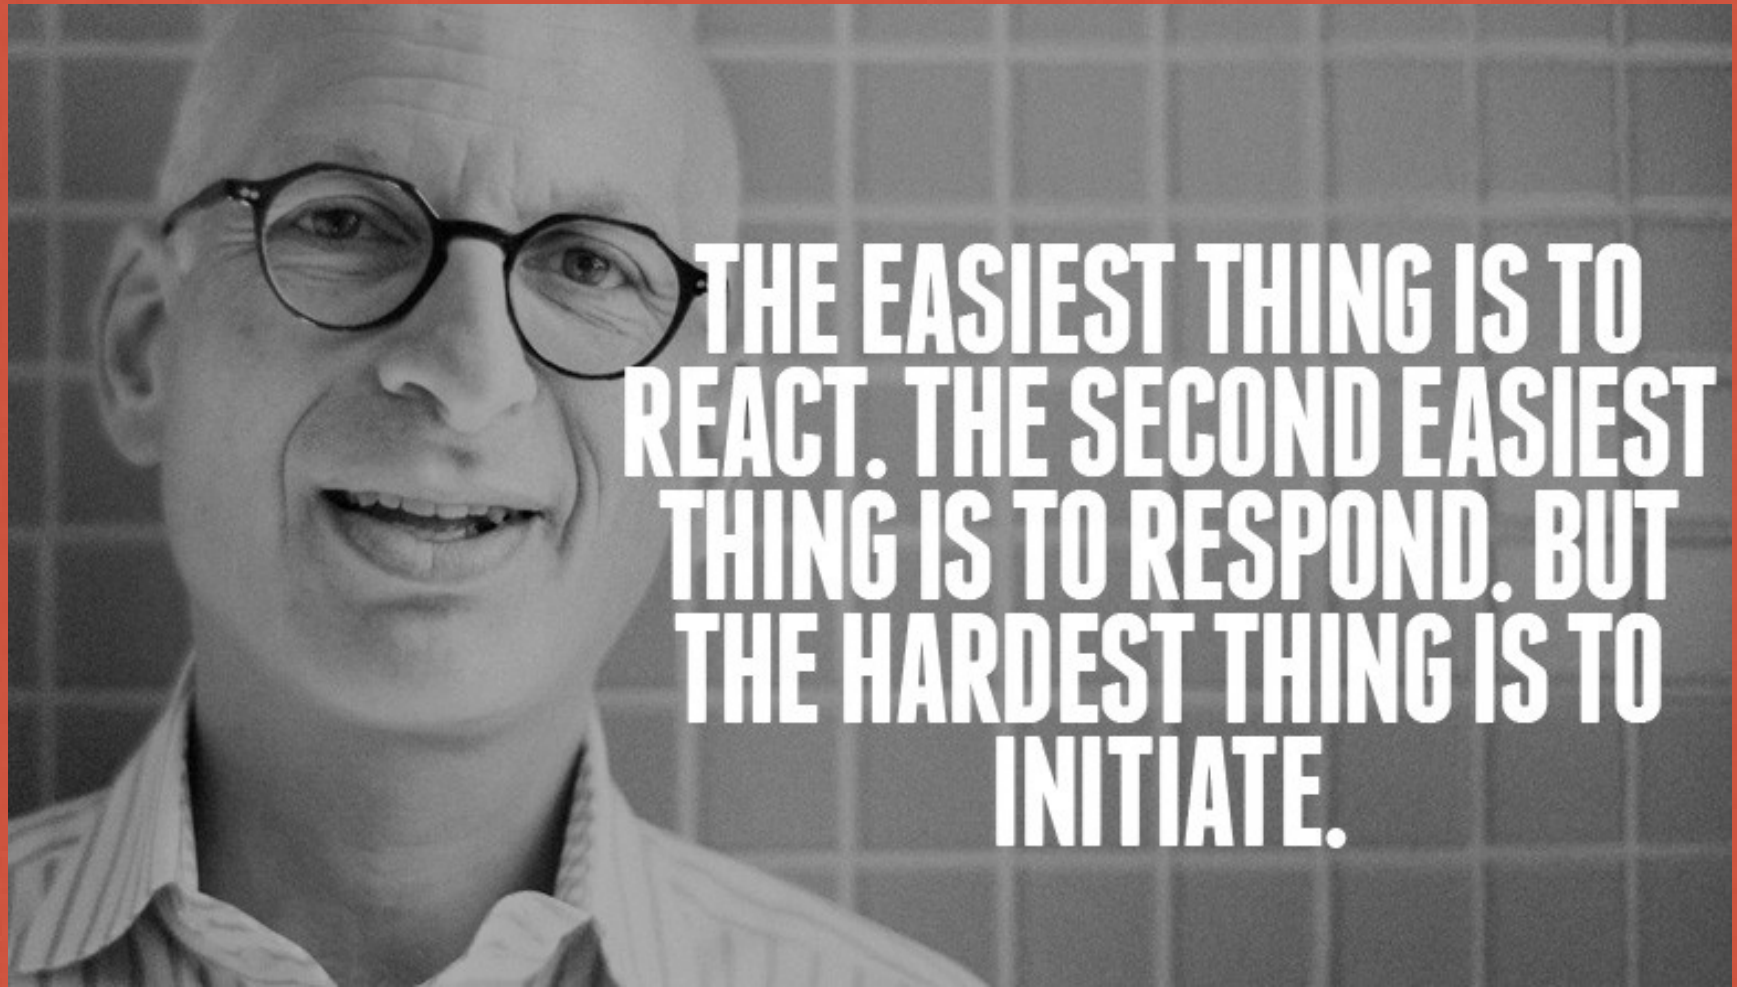

Use their experience, and already shared wisdom
don't re-invent the wheel, make genuine things

7

7 «

Start solving
problems and get
familiar with stuffs
you really care
about

**THE EASIEST THING IS TO
REACT. THE SECOND EASIEST
THING IS TO RESPOND. BUT
THE HARDEST THING IS TO
INITIATE.**

Lead your Tribe !!

Be the purple Cow

8

8 «

Free is about
freedom, freedom is
about greatness and
great things are \$\$\$

~~Free is not about \$\$~~

Free is ton about \$\$

Money != Creativity : you can end up filling excel worksheets with B Tech
but ,

Creativity = Money

Creativity = Hell lot of money !

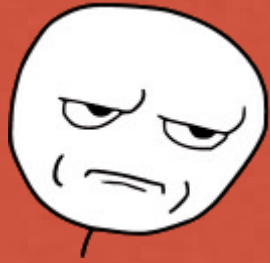

you have some idea you can execute that with the help of FOSS, and what's the cost : practically zero dollars

```
yum install httpd  
service httpd start > > > > > >
```

9

9 «

Solving complex
problems isn't
enough

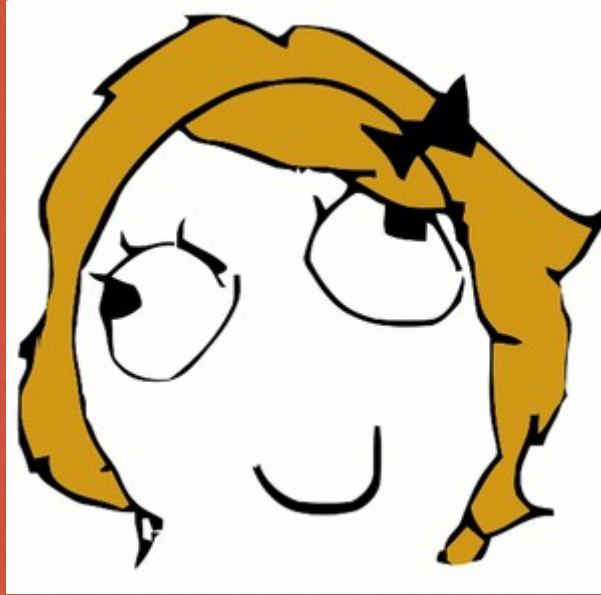

You have to have use case !!

You have to have a use case, Its fun doing things you love,
but if you want to make a real world impact you have to have a use case
Make something which is useful
Other people can use it.

10 «

The Last word

You need to be creative,

You need to think out of the box,

You need to learn state of the art,

You need to learn what already is there,

Things which are great, are easy , but they take some time,

Overnight success means there has been a great work behind that

Thanks,
